COLSA Corporation is the First Teammate to Achieve Three Teammate Certifications on AMCOM EXPRESS Contract

COLSA Corporation is the first teammate (out of 365) on SAIC's AMCOM EXPRESS contract to receive all three teammate certifications. SAIC's Teammate Management Plan focuses on three areas important to the customer – administrative performance, value of the services delivered, and collaboration. The Reporting Certification is awarded to teammates who consistently report expenditures, the Value Certification is awarded to teammates who charge reasonable rates for the services they provide, and the Collaboration Certification is awarded to exceptional teammates who provide new initiatives and strategies that help the Software Engineering Directorate achieve its goals.

COLSA was presented the certifications by SAIC in a ceremony where the SAIC representative stated, "COLSA delivers an exceptional value to the customer and is responsive in its administrative performance. As a long-time teammate supporting SED, COLSA understands the customer and the work. They work hard to bring new ideas to the customer, and to follow up with meetings and technical information to make things happen."
