## **COLSA Corporation Awarded its Second PEO STRI Omnibus Contract**

COLSA Corporation was notified today that it has been awarded a Simulation and Training Omnibus Contract (STOC II) by the U.S. Army's Program Executive Office for Simulation Training and Instrumentation (PEO STRI). COLSA will provide simulation, training and instrumentation services and products to Army and Department of Defense customers worldwide. This ten year, multiple-award, indefinite delivery/indefinite quantity contract has a two year base period of performance and three option ordering periods with a total ceiling value of \$17.5 billion for all awardees.

"COLSA has a successful history of supporting PEO STRI," said Dr. Richard Amos, COLSA's President. "We competed for and were awarded a STOC I contract in 2000 as a small business. Because of our exceptional track record on STOC I as well as our other contracts, COLSA has enjoyed significant growth and was able to compete with large businesses to win this STOC II contract in the full and open arena. We look forward to continuing our established relationship with PEO STRI and providing the first-rate customer focus and satisfaction that COLSA is known for."
